Thus we must form an ordered list from the 10 distinct letters. The solutions are k = 2: 10£9 = 90 k = 3: 10£9£8 = 720 k = 4: 10£9£8£7 = 5040 1.2.4. This can be done in many ways. Some methods lead to lots of cases joined by OR which must be added by the Rule of Sum; other methods lead to a few cases. Here is one of the simplest.
